

# What Does Social Distancing Look Like?

Special thanks to Kristen Rogers' 3/24/2020 [CNN Article](#).

Social Distancing means standing about 6 feet away from other people.

Why? If a person has COVID-19, when they talk, cough, sneeze, laugh, or sing, the virus could be carried in the air and water droplets from their mouth. If you stay 6 feet away, the virus doesn't reach you and instead falls on the ground.

Here is what 6 feet looks like:

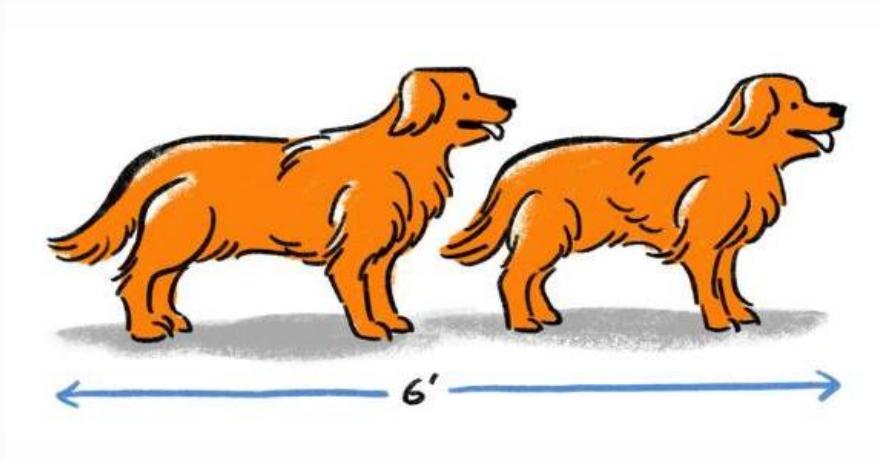

## Two Hula Hoops

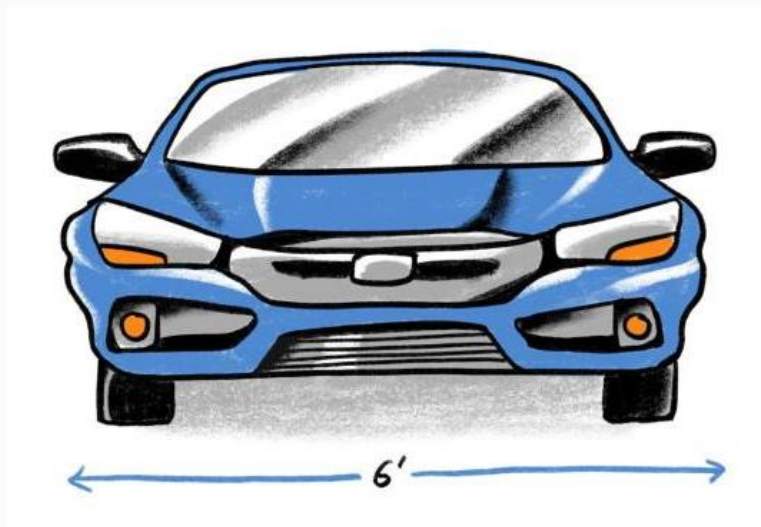

## A Beach Towel

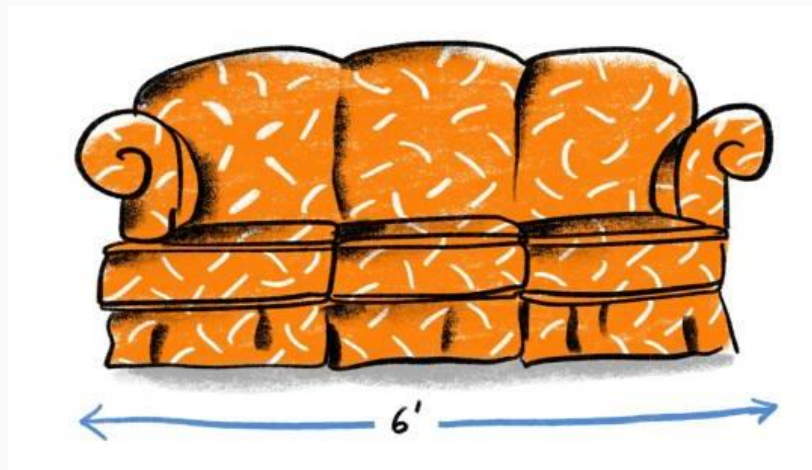

Two Golden Retrievers standing nose to tail

An average sedan

A sofa

A dining room table

The length of a mattress

A door
